## Professional Summary

Experienced Data Engineer with a proven track record of developing and implementing data solutions to drive business growth. Skilled in data modeling, ETL processes, and database management.

## Work Experience

### Data Engineer - Company X

- Developed ETL processes to extract, transform, and load data from various sources into a centralized data warehouse.
- Optimized database performance by implementing indexing strategies and query optimization techniques.
- Collaborated with cross-functional teams to design and implement data pipelines for real-time analytics.

### Data Analyst - Company Y

- Performed data cleaning and preprocessing tasks to ensure data quality and integrity.
- Created visualizations and reports to communicate insights to stakeholders and drive decision-making.
- Developed predictive models using machine learning algorithms to forecast key business metrics.

## Education

Bachelor of Science in Computer Science - University Z (Year)

## Skills

Technical Skills: SQL, Python, ETL Tools, Data Modeling, Database Management

Soft Skills: Problem-solving, Communication, Team Collaboration, Time Management

## Projects

### Customer Segmentation Project

Utilized clustering algorithms to segment customers based on their purchasing behavior, leading to targeted marketing strategies and increased sales.

### Sales Forecasting Dashboard

Developed a dashboard to visualize historical sales data and predict future sales trends, enabling better inventory management and resource allocation.

## Certifications

Certified Data Management Professional (CDMP)

# Hobbies & Interests

Reading, hiking, playing the guitar
