Professional Summary

Experienced data engineer with a strong background in designing and implementing data pipelines. Skilled in ETL processes, data modeling, and database management. Proven track record of delivering high-quality data solutions to meet business objectives.

Work Experience

Data Engineer - Tech Company X

- Developed and maintained ETL processes to extract, transform, and load data into the company's data warehouse.
- Designed data models to support analytics and reporting needs, improving data accessibility and query performance.
- Collaborated with cross-functional teams to understand data requirements and deliver scalable data solutions.

Data Analyst - Startup Company Y

- Performed data analysis to identify trends and insights that drove business decision-making.
- Built and optimized SQL queries to extract data from various sources for reporting purposes.
- Worked closely with stakeholders to define data requirements and ensure data accuracy and integrity.

Education

Bachelor of Science in Computer Science - University Z (Year)

Skills

Technical Skills: SQL, Python, ETL tools (e.g., Informatica, Talend), Data modeling, Database management

Soft Skills: Problem-solving, Communication, Team collaboration, Time management

Projects

Real-time Data Processing System

Developed a real-time data processing system using Apache Kafka and Spark to handle high-volume data streams efficiently.

Data Visualization Dashboard

Created a data visualization dashboard using Tableau to provide actionable insights to stakeholders based on key performance indicators.

Certifications

Certified Data Management Professional (CDMP)

Hobbies & Interests

In my free time, I enjoy hiking, playing the piano, and exploring new technologies in the data engineering field.
