Professional Summary

Experienced Data Engineer with a strong background in designing and implementing data pipelines. Proficient in handling large datasets and optimizing data workflows to drive business insights. Skilled in various programming languages and data manipulation tools.

Work Experience

Data Engineer - Tech Company X

- Developed and maintained scalable data pipelines to process and analyze terabytes of data daily.
- Collaborated with cross-functional teams to design data models and optimize database performance.
- Implemented monitoring and alerting systems to ensure data integrity and availability.

Data Analyst - Startup Y

- Performed data cleaning, transformation, and visualization to support business decision-making.
- Designed and implemented ETL processes to integrate data from multiple sources into a centralized data warehouse.
- Generated reports and dashboards to track key performance indicators and trends.

Education

Master of Science in Data Engineering - University Z, 20XX

Skills

Technical: Python, SQL, Hadoop, Spark, AWS, Docker

Soft: Problem-solving, Communication, Teamwork, Time Management

Projects

Real-time Data Processing System

Designed and implemented a real-time data processing system using Apache Kafka and Spark Streaming to analyze streaming data for anomaly detection.

Data Visualization Dashboard

Developed a data visualization dashboard using Tableau to provide stakeholders with interactive visualizations and insights into key performance metrics.

Certifications

Certified Data Engineer (CDE)

Hobbies & Interests

Traveling, Photography, Cooking
